GROUP 2 FINAL PROJECT

WEB SYSTEMS

BSIS 2B

BRIAN VIEL V. BORJE

Personal Role

I am the Github Manager as I am organized, possess a lot of knowledge and experience in using Github including other websites or applications and I am always active on social media and will always reply the moment the message is sent (unless I don't have signal). In this project my objective is to be able to cater my group mates needs regarding the repository or other matters.

What happened? well not much to say really, I created the folders and the things needed and let the others work (Raiver was a little late however due to his dad being hospitalized) and so far everything went well although there was a scuffle here and there because two of my classmates are arguing regarding proper documentation and communication.
